ABOUT

Senior Angular Frontend Developer with 7+ years of commercial experience building enterprise SaaS, on-premise, and B2B applications. Experienced in leading frontend teams of up to 5 engineers, designing frontend architecture, and delivering greenfield products from initial architecture to production release. Hands-on with OpenAI Codex, Agent Skills, agentic workflows, harness concepts, and orchestration. Actively follows emerging AI-assisted development practices and modern frontend technologies.

SKILLS

Frontend	Angular, RxJS, NgRx, NGXS, Nx, Signals, Standalone Components, TypeScript, JavaScript (ES6+)
Testing	Jasmine, Karma, Jest, Cypress
Architecture	Feature-Sliced Design, Nx Monorepo, DDD
Build & CI/CD	Webpack, Vite, GitHub Actions
Performance	Bundlephobia, Lazy Loading, Bundle Optimization
AI Engineering	OpenAI Codex, Agent Skills, Agentic Workflows, Harness Concepts, Orchestration
UI & Accessibility	HTML5, CSS3, SASS, Angular Material, Responsive Design
Practices	Agile/Scrum, Code Review, Git, Linux

EXPERIENCE

Bimeister

06/2023 - 06/2026

Industrial SaaS platform for asset and work management

- Led a frontend team of 3 engineers, owning technical decisions, task decomposition, code reviews, and frontend delivery.
- Migrated the project to an Nx monorepo, improving frontend modularity, dependency organization, and code sharing across application features.
- Created shared feature components reused across product areas, reducing duplicated implementations and simplifying development for adjacent teams.
- Expanded the internal UI kit with 10+ reusable components, improving UI consistency across product features.

TECHNOLOGIES Angular | TypeScript | RxJS | Nx | DDD | NGXS | HTML5 | CSS3 | SCSS | Jasmine | Karma | Cypress | GitLab

B2Broker

02/2022 - 05/2023

- Designed the frontend architecture for a greenfield Angular product spanning 5 major business domains: authentication, identity verification, helpdesk, billing (deposits and withdrawals), and account management.
- Established a Feature-Sliced architecture with clear boundaries between business domains and reusable application layers.
- Rebuilt the company's core frontend product from scratch and drove it through its first successful production release.
- Conducted cross-team code reviews and mentored junior developers, helping establish consistent engineering practices.
- Built comprehensive unit-test coverage across the project, reaching 84% code coverage with Jest.

TECHNOLOGIES Angular | TypeScript | RxJS | Jest | Vite | HTML5 | CSS3 | SCSS | Jira | Git

EXPERIENCE CONTINUED

Solarlab

08/2018 - 02/2022

Custom B2B platform and marketplace development for enterprise clients

Progressed from Trainee Developer to Senior Angular Developer within 3.5 years.

Conducted technical interviews and evaluated 20+ engineering candidates, contributing to frontend team growth.

Refactored legacy Angular modules, introduced route-level lazy loading, and optimized third-party dependencies to reduce the initial JavaScript payload and improve application startup performance.

TECHNOLOGIES Angular | TypeScript | RxJS | HTML5 | CSS3 | SCSS | Jira | Git | Webpack | JavaScript

EDUCATION

Sevastopol National Technical University, Sevastopol | Bachelor of Science in Computer Science and Engineering, 2014-2018

Microsoft Certified Professional | Exam 70-480 - Programming in HTML5 with JavaScript and CSS3
